# WELCOME

**Floranova launches NEW innovative varieties to the global market and is now more equipped than ever to provide high-quality genetics, service and support for any customer need.**

It has been a challenging couple of years for business due to the COVID-19 pandemic, the adaption to BREXIT and the implementation of SAP. Despite this disruption, I am extremely proud of the teams' resilience at Floranova and sincerely thank our customers for their patience and understanding as we adapted to the changes in our business.

Our assortment this year expands with new flower introductions such as Digitalis Dottie (pg.68), Kale Bright and Early (pg.60), Bellis Bam Bam White Blush (pg.59), Celosia Too Hot to Handle (pg.10), Coleus Mezmerize® (pg.12) and Petunia Hang Out (pg.45).

New eye-catching colours have also been added to existing flagship varieties, such as Antirrhinum Crackle and Pop (pg.3-4), Vinca SunJewels (pg.55), Pansy Freefall XL (pg.62) and Viola Bel Viso (pg.63-64). While new additions Squash Silver Dust (pg.83) and Nasturtium Ice-Cream Sundae (pg.78) join an already extensive edible range.

We will continue to work diligently to provide the best seed genetics across temperate to equatorial markets. With extensive breeding programmes across Europe and Asia, I anticipate their advancements; it is always an exciting time to see what was once just a conceptual idea take a step closer to becoming a tangible product.

I feel extremely privileged to work in this industry and alongside everyone at Floranova. We are united within our love of horticulture which is reflected throughout our creative flower and vegetable assortment.

It just leaves me to say, to all our customers, old and new – thank you for your partnership!

## ALYSSUM

### NORTH FACE

*Lobularia maritima* (Tetraploid)

North Face is a new tetraploid Alyssum with a wonderful cascading habit, making it ideal as a hanging basket, container filler or in the garden border. The larger pure white flowers and improved vigour result in a better showing at retail stage and with the consumer, whilst the lower growing and well branched habit is easier to handle for the growers.

Seed Form	Coated, Natural
Seed Count	2,500/g
Garden Height	13 - 15cm
Garden Spread	30 - 40cm
Flower Size	½cm

# ANTIRRHINUM

## ANTIQUITY

F1 Antirrhinum majus

Antirrhinum Antiquity is an open flowered series which is ideally suited to larger containers or garden borders. Antiquity has extremely robust dark foliage and great branching, resulting in outstanding garden performance. The improved branching also makes this variety more suitable for Summer and Autumn production where it fills the pot better before flowering.

Seed Form	Natural
Seed Count	7,500/g
Garden Height	23 - 28cm
Garden Spread	35 - 40cm
Flower Size	3cm

## CRACKLE & POP

F1 Antirrhinum majus

Antirrhinum Crackle & Pop is an early flowering dwarf snapdragon with strong pack, pot and garden performance. The well branched plants are covered by well formed flower spikes which bloom in a very tight flowering window.

Seed Form	Natural
Seed Count	7,500/g
Garden Height	15 - 25cm
Garden Spread	25 - 30cm
Flower Size	3cm

## REMINISCENT

Antirrhinum majus

A subtle mix of antique shades with an open flower form. Delicately fragranced, Reminiscent is perfect for beds or containers in areas near seating, so everyone can enjoy the sweet scent.

Seed Form	Natural
Seed Count	10,000/g
Garden Height	30 - 35cm
Garden Spread	30 - 35cm
Flower Size	10cm

Reminiscent Mix

# BEGONIA

## BOSSA NOVA

F1 Begonia x hybrida

Begonia Bossa Nova brings the carnival to your containers. Full of flower and available in a range of eight bright colours, Bossa Nova is sure to add a new dimension to your bedding displays. Brilliant blooms cover the plant from late Spring until first frost and the well branched plants look stunning in a large container or hanging basket, either singly or as part of a combo. Available as pelleted seed, Bossa Nova is the economical alternative to cutting raised Begonia. The large flowers and nonstop flowering make Bossa Nova a great choice for any climate, but it will particularly thrive in warm situations, even where other Begonia have failed.

Seed Form	Pelleted
Seed Count	100,000/g
Garden Height	30 - 40cm
Garden Spread	40 - 50cm
Flower Size	5 - 8cm

# BEGONIA

## IKON

F1 Begonia x hybrida

Begonia Ikon's unique habit combines delightfully tactile foliage with a wonderfully branching habit and masses of blush white flowers. Bred in Costa Rica, this variety knows how to perform in the plug, pot, landscape or even hanging basket. Begonia Ikon Green was described as a "Showstopper" and voted Best Basket Plant in the Dallas Arboretum 2012 Trials where it took full Texas sun 'without even a crispy leaf'. Not to be outdone by its counterpart is the equally adaptable Ikon Bronze, with its darker waxy foliage creating a fantastic contrast as is seen with Ikon mix, a perfect mix of the two. Ikon Bronze naturally matches Ikon Green in its versatility of performance.

Seed Form	Pelleted
Seed Count	170,000/g
Garden Height	30 - 40cm
Garden Spread	40 - 50cm
Flower Size	3 - 4cm

# CALENDULA

## COSTA

Calendula officinalis

Calendula Costa is a dwarf and well branched variety with excellent uniformity and flower size compared to existing varieties. Due to its earliness, Costa is an ideal companion plant to sell in Spring alongside Viola and Pansy. Available as three separate colours and as a formula mix, Costa is perfect for 9cm - 13cm pot production.

Seed Form	Natural
Seed Count	150/g
Garden Height	25 - 30cm
Garden Spread	25 - 30cm
Flower Size	5 - 8cm

# CELOSIA

## TOO HOT TO HANDLE

Celosia cristata

A cristata type that is ideally suited to the landscape and particularly suited to a short day climate. Tall branching habit and the secondary flowers create a mass of colour. For long day climates it will flower 3-4 weeks later.

Seed Form	Natural
Seed Count	1,200/g
Garden Height	60 - 70cm
Garden Spread	50 - 55cm
Flower Size	6 - 10cm

Too Hot to Handle Purple  
70104676

70104677

# CELOSIA

## BRIGHT SPARKS

Celosia plumosa erecta

Celosia Bright Sparks is an outstanding variety with very large intense coloured plumes. Unrivalled in colour, early to flower and with greater branching which leads to more flowers per plant. Bred to withstand heat and humidity without fading in colour, this variety makes an outstanding landscape or container plant.

Seed Form	Natural
Seed Count	1,700/g
Garden Height	35 - 45cm
Garden Spread	25 - 30cm
Flower Size	15 - 20cm

COSMOS

APOLLO

Cosmos bipinnatus

Cosmos Apollo brings great benefits for growers, retailers and consumers alike. The naturally dwarf habit and shorter internodes makes for a better colour display, extended shelf life and ease of transport. The super-large flowers and overlapping petals make a greater impact in containers or the garden. The best Cosmos for pot production - flowering in a 10cm pot.

Seed Form	Natural
Seed Count	150/g
Garden Height	55 - 65cm
Garden Spread	50 - 60cm
Flower Size	10cm

DIANTHUS

IQ

F1 Dianthus chinensis x barbatus

Dianthus IQ is an F1 hybrid interspecific Dianthus that holds its flowers clustered in an 'umbrella' on top of the foliage. More than seven days earlier than comparable series, with a superb natural dwarf habit. An excellent product for packs or small pots and with great flower presentation at point of sale.

Seed Form	Pelleted, Natural
Seed Count	1,300/g
Garden Height	18 - 23cm
Garden Spread	18 - 23cm
Flower Size	3 - 3½cm

IVY GERANIUM

REACH OUT

F1 Pelargonium peltatum

Geranium Reach Out is a series of F1 Ivy Leaf Geranium that has a compact habit which is unrivalled when it comes to pack production. Early to flower and easier to produce than competing varieties due to its compact habit and short internodes. The Reach Out series produces a full canopy of flowers all over the plant and does not get 'tangled up' in production like other varieties. Superb landscape, container and basket performance.

Seed Form	Natural, Coated
Seed Count	200/g
Garden Height	15 - 20cm
Garden Spread	25 - 35cm
Flower Size	3 - 4cm

# IVY GERANIUM/GERANIUM

## SUMMERTIME

*Pelargonium peltatum*

Summertime's short internodes and early, free-flowering habit make it a great peltatum for industrial production. These features make it possible to finish Summertime in the pack or pot, with plants flowering before they begin to cascade over the edge of the container - minimising tangling with other plants.

Seed Form	Natural
Seed Count	220/g
Garden Height	30 - 40cm
Garden Spread	15 - 20cm
Flower Size	4cm

Summertime Mix  
70112440

## CABARET

*F2 Pelargonium x hortorum*

Superb seed quality, plug uniformity and garden performance make Geranium Cabaret the best choice for high volume Geranium production. 100-110 days from sowing to flower. The number one choice F2 Mixed Geranium for growers worldwide.

Seed Form	Natural, Coated
Seed Count	200/g
Garden Height	30 - 35cm
Garden Spread	25 - 30cm
Flower Size	10 - 12cm

Cabaret Mix

GERANIUM

HORIZON

F1 Pelargonium x hortorum

Geranium Horizon's natural basal branching sets it aside from competing varieties and reduces production costs with a lesser requirement for PGR applications. Horizon is the grower's first choice for high density pot and pack production due to its earliness, uniformity and short, sturdy flower stems. In the landscape or container, Horizon's 360° branching and hybrid vigour makes for a stunning display into late Summer.

HORIZON SHADOW

F1 Pelargonium x hortorum

Horizon Shadow is a new member of the Horizon family. Offering rich, dark foliage that contrasts beautifully with the bold, bright colours in this series. This new addition displays all of the key features we expect from Horizon; natural basal branching and reduced production costs with a lesser requirement for PGR applications. Like Horizon, Horizon Shadow is a great choice for high density production, due to it's earliness, uniformity and short, sturdy flower stems. In the landscape or container, Horizon Shadow's 360° branching and hybrid vigour makes for a stunning display into late Summer.

# GERANIUM

## LANDSCAPER

F1 Pelargonium x hortorum

Geranium Landscaper Red is the best option available for landscaping. Large flower heads and vigorous plants mean that planting densities can be decreased with no reduction in the visual appeal.

Seed Form	Natural, Coated
Seed Count	220/g
Garden Height	30 - 40cm
Garden Spread	30 - 35cm
Flower Size	12 - 15cm

Landscaper Red  
70092127

## QUANTUM

F1 Pelargonium x hortorum

This unique F1 Geranium Quantum has outstanding heat tolerance and long flowering in regions with high temperatures. The attractive star-shaped flowers are less prone to shattering, therefore giving a great display of colour for much longer. With the added attraction of serrated foliage, Quantum really can add something new to your assortment.

Seed Form	Natural, Coated
Seed Count	220/g
Garden Height	30 - 40cm
Garden Spread	30 - 40cm
Flower Size	10 - 12cm

Quantum Red  
70092129

Quantum Mix  
70092128

# HIBISCUS

## HONEYMOON

F1 Hibiscus moscheutos

Hibiscus Honeymoon is available as 4 distinct colours including the deepest red ever introduced. Honeymoon is a truly eyecatching variety with real shelf appeal. It creates a naturally wellbranched plant, reaching 60 - 80cm which is ideal for large containers or for planting out directly in the garden. Honeymoon is a very heat tolerant variety and will enjoy a sunny spot in the garden. Hibiscus responds very well to growth regulators, and with the correct programme will make a very saleable, bushy, flowering plant in as little as 14 weeks from sowing.

Seed Form	Natural
Seed Count	100/g
Garden Height	60 - 80cm
Garden Spread	50 - 60cm
Flower Size	15 - 20cm

# IMPATIENS

## ATHENA

F1 Impatiens walleriana

Impatiens Athena brings to the market the great impact of consistently semi-double blooms on a high quality product suitable for industrial production. Athena's spreading habit makes it well suited to hanging baskets. The fantastic colour range gives it superb point of sale appeal and makes it stand out in the landscape. Athena is the only semi-double seed raised Impatiens on the market.

Seed Form	Natural, Elitech
Seed Count	1,700/g
Garden Height	25 - 30cm
Garden Spread	35 - 40cm
Flower Size	4cm

## WHITEGOLD MAX

F1 Tagetes erecta

Intermediate type African Marigold with near white flowers, which are tightly formed, to resist disease in the landscape. Recommended for larger pots and landscape use.

Seed Form	Clipped, Coated
Seed Count	300/g, 150/g
Height	35 - 40cm
Garden Spread	20 - 25cm
Flower Size	7 - 8cm

**WhiteGold Max**  
70107212

## WHITEGOLD MINI

F1 Tagetes erecta

WhiteGold Mini is the first near white African Marigold in the dwarf class, producing many secondary flowers that cover the compact plants. Although it performs admirably in the garden, it is recommended for pack and small pot sales due to the dwarf habit.

Seed Form	Clipped, Coated
Seed Count	300/g, 150/g
Height	20 - 25cm
Garden Spread	15 - 20cm
Flower Size	6 - 7cm

**WhiteGold Mini**  
70107164

WhiteGold Mini is perfect for pack and smaller pot production (9-12cm), whereas WhiteGold Max is a great option for larger pots (10.5-16cm) and landscape use.

# FRENCH MARIGOLD

## ALUMIA

Tagetes patula nana

French Marigold Alumia delivers large blooms and strong branching stems. Available as 7 strong colours including the unique 'Vanilla Cream' and 'Crème Brûlée', perfect choices for that special item in a mixed combo. A great choice for pots, packs and the garden.

*Only on Crème Brûlée and Vanilla Cream

SALVIA

MOJAVE

Salvia splendens

Salvia Mojave has long been the first choice of growers and landscapers because of its intense red colour, dense flower spike, robust dark green foliage and very uniform habit. Now available in a range of colours to complement the original red. We have also improved both the plant habit and the seed quality of Mojave to further cement its place at the top of your assortment.

Seed Form	Natural, Elitech
Seed Count	280/g
Garden Height	25 - 30cm
Garden Spread	25 - 30cm
Flower Size	15cm

SALVIA

RED SALVIA

Salvia splendens

Oasis is like a big brother to Mojave Red. It has similar characteristics: dark green, heart shaped leaves, dense, vivid red flower spike and excellent heat tolerance. The main difference is that Oasis is approx 10cm taller, making it the perfect choice for large pots and landscape use.

Salvia Sahara has bright red, dense flower spikes that hold their colour intensity throughout the season, even in the heat. Sahara performs well in packs but is ideally suited to larger pots and the landscape due to its intermediate plant height. A facultative short day variety.

Salvia Sentry brings an intense red colour and dense flower spike of our top selling variety Mojave, with the added benefit of earliness and a compact, uniform plant habit. This makes Sentry a great choice for smaller pots and packs whilst retaining that great garden performance.

Seed Form	Natural
Seed Count	265/g
Garden Height	35 - 40cm
Garden Spread	25 - 30cm
Flower Size	15 - 20cm

TORENIA

HI-LITE

F1 Torenia fournieri

Hi-Lite was bred in India and selected to withstand intense heat and sun without damage to the flowers or foliage. The compact, domed habit and 360° branching make Hi-Lite the perfect choice for smaller formats, with equally impressive garden performance, considering the neat habit. The bright colour range includes two unique beacon types – another good reason to choose Hi-Lite!

Seed Form	Pelleted
Seed Count	100,000/g
Garden Height	30 - 40cm

VITESSE

Catharanthus roseus (Vinca)

A unique colour in F1 hybrid Vinca which offers good vigour and branching, combined with excellent seed quality and good all-round disease tolerance. Ideal for using in mixes and combinations to add a novel twist to the usual colour blends.

Seed Form	Natural
Seed Count	550/g
Garden Height	25 - 30cm
Garden Spread	30 - 40cm
Flower Size	5 - 5½cm

# ZEA MAYS

## FIELD OF DREAMS

Zea mays (Ornamental Corn)

Field of Dreams is a really eye-catching variety with a very strong white stripe running through the pink tinged green leaves. More compact and branching than existing varieties, it is ideally suited to use as the centrepiece of a container or in a landscape display.

Seed Form	Natural
Seed Count	6/g
Garden Height	150 - 180cm
Garden Spread	80 - 100cm
Flower Size	30cm (Tassel)

Field of Dreams  
70046025

# ZINNIA

## JULIETTE

Zinnia elegans

Juliette is a great choice for economical production. In a range of bright, bold colours with great heat tolerance, it's double and semi double flowers put on a real show of colour in the landscape. It is best suited to smaller pot and pack production.

Seed Form	Natural, Pelleted
Seed Count	150/g
Garden Height	25 - 30cm
Garden Spread	25 - 30cm
Flower Size	8 - 9cm

## BELLIS

### BAM BAM

*Bellis perennis*

Bellis Bam Bam is a unique variety with large flowers, naturally compact habit and non-stretch stems. This hardy variety does not need vernalisation and therefore can be sold in both Autumn and in Spring alongside other cool crops such as Pansy, Viola, Primrose etc. As the name suggests, despite being short in stature, this variety really packs a punch with its large showy blooms and looks great in packs, small pots and colour bowls.

Seed Form	Pelleted, Natural
Seed Count	6,500/g
Garden Height	8 - 10cm
Garden Spread	13 - 15cm
Flower Size	5 - 6cm

KALE

BRIGHT AND EARLY

F1 Brassica oleracea

As the name suggests, Bright and Early is one of the first ornamental Kale series to show colour in the Autumn, without the need for vernalisation. Its naturally compact habit makes it the perfect choice for smaller pot production, requiring less PGR applications to control height. The fringed leaves add ornamental value and make it a great option for Winter combinations alongside Pansy and Viola.

Seed Form	Natural
Seed Count	350/g
Garden Height	15 - 25cm
Garden Spread	20 - 25cm

PANSY

FREEFALL®

F1 Viola x wittrockiana

Pansy Freefall® is the growers choice for Spring and Autumn baskets! Compared to competing varieties, Freefall® comes in a wider range of colours and produces flowers all over the plant. The sustained day-length neutral flowering means that Freefall® will flower much later into Winter and will also be first to flower in Spring.

Seed Form	Natural, Primed
Seed Count	1,300/g
Garden Height	10 - 15cm
Garden Spread	35 - 50cm
Flower Size	4 - 5cm

TIGER EYE

F1 Viola cornuta

Floranova has markedly improved the performance of Viola Tiger Eye and also added a new colour and a striking mix. Earlier flowering, much improved plant habit and better seed quality now means this unique colour can be grown alongside the mainstream Viola and Pansy crops. An absolute must for any Halloween promotion.

Garden Height	30cm
Garden Spread	25cm
Flower Size	2 - 3cm

## SUGAR RUSH

F1 Cheiranthus cheiri

Wallflower Sugar Rush requires no cool temperatures for flowering! This F1 hybrid Cheiranthus can be sold in late Summer or early Autumn from as little as 9 weeks from sowing. Even during warm temperatures it still produces dark green healthy foliage and great natural branching. Once planted out it will withstand heavy frost and wintery conditions, making a nice bushy plant that will then re-flower in early Spring. Alternatively, it can be sold as a flowering plant in early Spring in as little as 14-16 weeks from sowing. The perfect addition for Autumn and Winter gardening. A versatile companion to Pansies!

## AUBERGINE

### AMETHYST

F1 Solanum melongena

A compact, well branching variety with vibrant purple fruit averaging 3oz (86g), Amethyst crops heavily on predominantly spineless plants. Purple flowers and silver grey foliage make this an attractive plant even at an early stage. F1 Amethyst is very well suited to containers and open ground in a warm sunny location.

Seed Form	Natural	Plug Time	18 - 22 days
Seed Count	260/g	Days to Maturity	60 - 65 days
Plant Height	55cm	Fruit Colour	Purple
Plant Spread	45cm	Fruit Shape	Oval
Pot Size	35cm	Fruit Weight	86g

Amethyst  
70091867

### PINSTRIPED

F1 Solanum melongena

F1 Pinstripe has a striking purple and white striped fruit weighing around 2.8oz (80g). It produces a compact, branching plant with silver grey foliage which is spineless in most conditions. Pinstripe is very well suited to containers and open ground in a warm sunny location. Fruit may be picked at a young stage for baby fruit which can be eaten whole, or left to mature to larger fruit as required. Pinstripe crops over a very long period.

Seed Form	Natural	Plug Time	18 - 22 days
Seed Count	260/g	Days to Maturity	60 - 65 days
Plant Height	55cm	Fruit Colour	Purple/White
Plant Spread	45cm	Fruit Shape	Oval
Pot Size	35cm	Fruit Weight	80g

Pinstripe  
70092265

### ANCONA

F1 Solanum melongena

A compact, well branching variety with creamy white fruit averaging around 3oz (85g), Ancona crops heavily on predominantly spineless plants. Purple flowers and silver grey foliage make this an attractive plant even at an early stage. Suited to containers and open ground in a warm sunny location. Fruit mature over a long cropping period and can remain on the plant for a long time before over maturing.

Seed Form	Natural	Plug Time	18 - 22 days
Seed Count	260/g	Days to Maturity	60 - 65 days
Plant Height	55cm	Fruit Colour	White
Plant Spread	45cm	Fruit Shape	Oval
Pot Size	35cm	Fruit Weight	85g

Ancona  
70104179

### JACKPOT

F1 Solanum melongena

A prolific cropping variety yielding average 2.8oz (80g) dark purple fruit over a long cropping period. F1 Jackpot has exceptional early establishment and good vigour. The compact habit and attractive plant shape make this an ideal garden variety. Very well suited to containers and open ground in a warm sunny location. Fruit can also be harvested small as a true baby vegetable.

Seed Form	Natural	Plug Time	18 - 22 days
Seed Count	260/g	Days to Maturity	58 - 62 days
Plant Height	55cm	Fruit Colour	Black
Plant Spread	45cm	Fruit Shape	Oval

BASIL

Aristotle  
70092320

FLORAL SPIRES

Floral Spires are compact varieties bred with flowering in mind. Plant habit is very uniform and the foliage resembles a dense, bushy Thai Basil. Floral Spires make great flowering plants but they are also excellent for culinary use. The well flavoured, aniseed scented leaves are a great alternative to standard Basil. Floral Spires is an ideal windowsill plant but is equally happy in a pot or planted out in the garden. Floral Spires’ strong stems ensure the plants perform very well throughout their production cycle and as a finished plant.

Seed Form	Natural
Seed Count	780 /g
Plant Height	25cm
Plant Spread	20cm
Pot Size	15cm
Plug Time	21 - 24 days
Days to Maturity	56 days

Floral Spires White  
70092322

ARISTOTLE

Ocimum basilicum

Aristotle is a small leaved, highly aromatic and highly disease resistant Basil with a very neat rounded plant habit. Aristotle looks as good as it tastes and makes a delightful feature plant in pots or containers or even planted into a sunny spot in the garden. Strong stems, late flowering and good tolerance to poor weather make this variety a very good choice for garden performance.

Seed Form	Natural
Seed Count	780 /g
Plant Height	25cm
Plant Spread	25cm
Pot Size	15cm
Plug Time	21 - 24 days
Days to Maturity	63 days

BORECOLE

FROST BYTE

Brassica oleracea L. convar.acephala(DC.) Alef. var sabellica L.

An edible Kale which is also highly ornamental. Textured and ruffled leaves develop a striking contrasting white centre as they mature and have a very sweet flavour, even the leaf stalks are sweet and have the crispest texture. Ideal used for multiple cuts prolonging the harvesting period. Colouration increases with the colder temperatures.

Seed Form	Natural
Seed Count	427 /g
Plant Height	25 - 30cm
Plant Spread	25 - 30cm
Pot Size	13 - 20cm
Plug Time	10 days
Days to Maturity	90 - 100 days

CUCUMBER

Peticue  
70092263

PETICUE

F1 Cucumis sativus

Peticue is a short vining/bush slicing cucumber bred to stay compact, with the vines using only one third of the space of a standard variety. Plants mature in just 45 days. Pick the green fruit at 7 - 9" (18 - 23cm) for the best tasting, crunchy-sweet cues. Harvest regularly to increase the yield.

Seed Form	Natural
Seed Count	36/g
Plant Height	15cm
Plant Spread	60cm
Pot Size	25cm
Plug Time	10 - 14 days
Days to Maturity	45 days
Fruit Colour	Green
Fruit Shape	Smooth
Fruit Weight	Pick at 18 - 23 cm

PETIPIKEL

F1 Cucumis sativus

Petipikel is a short vining/bush pickling cucumber. Petipikel has been bred to stay compact, with the vines using only one third of the space of a standard variety. Plants mature in just 45 days. Pick the green striped, spined fruit at 3 - 5" (8 - 13cm) for the best results. Harvest regularly to increase the yield. Best used for pickling, but fruit can be left until 7" long and used fresh.

Seed Form	Natural
Seed Count	36/g
Plant Height	15cm
Plant Spread	60cm
Pot Size	25cm
Plug Time	10 - 14 days
Days to Maturity	45 days
Fruit Colour	Green
Fruit Shape	Gherkin
Fruit Weight	Pick at 8 - 13 cm

HOT PEPPER

ALTER EGO

F1 Capsicum annuum

Hot Pepper Alter Ego as the name suggests is both hot but also sweet. The naturally dwarf habit makes it perfect for use in patio containers and small gardens. The large upward facing fruits are very ornamental, held above the foliage and turning from shades of cream & light purple as they finally mature to bright red. The plant has exceptional branching which results in a much higher yield of fruits than older varieties. Not only does this result in a fantastic crop for use in home cooking but also increases the ornamental appeal. Furthermore, this new variety has been bred to withstand both intense heat and full sun without fruit damage as well as strong disease tolerance, making it longer lasting than other varieties.

Seed Form	Natural	Days to Maturity	85 - 95 days
Seed Count	220/g	Fruit Colour	Lime green/Red
Plant Height	45cm	Fruit Shape	Medium Tapered
Plant Spread	55cm	Fruit Weight	22g
Pot Size	20 - 30cm		
Plug Time	24 - 28 days		

Alter Ego  
70092266

APACHE

F1 Capsicum frutescens

A very attractive compact Chilli Pepper producing masses of super-hot, bright red fruit. Apache is a very adaptable plant that will grow happily in most container sizes. Apache can also be kept very compact for use as a Bonsai plant. Schoville heat rating approx. 80,000 shu.

Seed Form	Natural	Days to Maturity	90 - 95 days
Seed Count	220/g	Fruit Colour	Red
Plant Height	55cm	Fruit Shape	Medium Tapered
Plant Spread	55cm	Fruit Weight	20g
Pot Size	25cm		
Plug Time	24 - 28 days

ATOMIC

F1 Capsicum annuum

Hot Pepper Atomic is a dramatic new container variety. The naturally dwarf habit makes it perfect for use in patio containers and small gardens. The large upward facing fruits are also very ornamental, being held above the foliage canopy and turning from deep purple as they finally mature to bright red. The plant has exceptional branching which in turn results in a much higher yield of fruits than older varieties. Not only does this result in a fantastic crop for use in home cooking but also increases the ornamental appeal. This new variety has been bred to withstand both intense heat and full sun without fruit damage as well as strong disease tolerance, making it longer lasting than other varieties.

Seed Form	Natural	Days to Maturity	85 - 95 days
Seed Count	220/g	Fruit Colour	Green/Black/Red
Plant Height	45cm	Fruit Shape	Medium Tapered
Plant Spread	55cm	Fruit Weight	22g
Pot Size	20 - 30cm		
Plug Time	24 - 28 days

HOT PEPPER

Basket of Fire  
70093989

CAYENNETTA

F1 Capsicum annuum

An All American Selections Winner, Cayennetta is a compact branching cayenne type chilli. It has a very neat, attractive habit and produces a large crop of bright red 4 inch tapered fruit underneath the attractive leaf canopy. The fruit are mild in heat, reaching around 20,000 shu. Cayennetta has tolerance to both very hot and cold seasons and fruits are resistant to sun scorch, making it a good all round performer in any garden.

Seed Form	Natural
Seed Count	220/g
Plant Height	25cm
Plant Spread	55cm
Pot Size	25cm
Plug Time	24 - 28 days
Days to Maturity	90 days
Fruit Colour	Green/Red
Fruit Shape	Long tapered
Fruit Weight	15g

Cayennetta  
70092268

BASKET OF FIRE

F1 Capsicum annuum

A prolific fruiting variety which is dripping with small hot fruit on a compact semi-trailing plant. The fruits mature from deep purple through cream and orange to finish a bright red. Basket of Fire's unique plant habit makes it a perfect choice for hanging baskets and containers. The plants have a good tolerance to cooler weather , lasting well into the Autumn. Harvested fruit are easy to dry as well as being ideal for fresh use. Schoville heat rating approx. 80,000 shu.

Seed Form	Natural	Days to Maturity	90 - 95 days
Seed Count	220/g	Fruit Colour	Yellow/Orange/Red
Plant Height	45cm	Fruit Shape	Small Thin
Plant Spread	60cm	Fruit Weight	5g
Pot Size	30cm		
Plug Time	24 - 28 days		

Loco  
70092270

LONGHORN

F1 Capsicum annuum

Hot Pepper Longhorn is a vigorous but very high yielding new variety. The very long fruits are much larger than competing varieties and have an unusual 'curl' at the end - hence the name Longhorn! The fruits are tasty but mild in heat, with a Schoville heat rating of 15-20,000 shu. Bred in intense heat, Longhorn will withstand intense heat and direct sun without any damage to the fruits. Whilst it can still be grown in a container, Longhorn will require support because of the large volume of fruit.

Seed Form	Natural	Days to Maturity	85 - 95 days
Seed Count	220/g	Fruit Colour	Red
Plant Height	100cm	Fruit Shape	Very Long Tapered
Plant Spread	70cm		
Pot Size	25 - 30cm		
Plug Time	24 - 28 days		

Longhorn  
70092271

Chenzo  
70092269

CHENZO

F1 Capsicum annuum

Chenzo produces a compact well branching plant that forms an attractive, neat dome. Fruit are black maturing to bright red and crop heavily. Chenzo has a good resistance to cool temperatures. Suitable for fresh chilli use or for drying. Chenzo is very well suited to pots, containers and window boxes. Schoville heat rating approx. 45,000 shu.

Seed Form	Natural	Days to Maturity	90 - 95 days
Seed Count	220/g	Fruit Colour	Orange
Plant Height	55cm	Fruit Shape	Large Tapered
Plant Spread	50cm	Fruit Weight	25g
Pot Size	30cm		
Plug Time	24 - 28 days		
Days to Maturity	82 - 85 days		
Fruit Colour	Black		
Fruit Shape	Medium Tapered		
Fruit Weight	10g		

Orange Spice  
70106194

ORANGE SPICE

F1 Capsicum annuum

Orange Spice is a compact chilli pepper with an elegant arching habit, highly suitable for use in hanging baskets if left unstaked. Bright orange medium-hot fruit contrast well against the bright green foliage, creating an eye-catching display in the garden. Schoville heat rating approx. 40,000 shu.'

Seed Form	Natural	Days to Maturity	90 - 95 days
Seed Count	220/g	Fruit Colour	Orange
Plant Height	45cm	Fruit Shape	Large Tapered
Plant Spread	50cm	Fruit Weight	25g
Pot Size	30cm		
Plug Time	24 - 28 days		

HOT PEPPER

LOCO

F1 Capsicum annuum

A very compact grower with excellent branching; Loco carries a heavy yield of oval fruits which ripen from purple to red. The colourful fruit hold themselves neatly above the foliage, making Loco an ideal edible ornamental.

Seed Form	Natural	Days to Maturity	82-85 days
Seed Count	220/g	Fruit Colour	Purple/Red
Plant Height	45-50cm	Fruit Shape	Oval
Plant Spread	55-60cm	Fruit Weight	10g
Pot Size	15- 30cm		
Plug Time	24-28 days		

NASTURITUM

ICE CREAM SUNDAE

Tropaeolum majus (Nasturtium)

Very free flowering variety which produces edible flowers with a subtle mild spicy, peppery flavour. Flowers are held clearly above the foliage and will change colour with the temperature, going from lemon yellow to scarlet red in a matter of days. Compact habit.

Seed Form	Natural
Seed Count	8/g
Plant Height	30 - 35cm
Plant Spread	20cm
Pot Size	13 - 20cm
Plug Time	Direct Sow
Days to Maturity	60 - 70 days

# SWEET PEPPER

## BIG BEN

F1 Capsicum annum

A unique innovative sweet pepper with a dwarf habit, producing very large red fruits with a thick wall. The upright but compact habit, makes it ideal for containers and patio pots producing sweet juicy fruit.

Seed Form	Natural
Seed Count	200/g
Plant Height	50cm
Plant Spread	50cm
Pot Size	15-30cm
Plug Time	24 - 28 days
Days to Maturity	73 - 78 days
Fruit Colour	Red
Fruit Shape	Long Block
Fruit Weight	Up to 350g

Big Ben  
70104120

## LIBERTY BELLE

F1 Capsicum annum

Sweet Pepper Liberty Belle is an outstanding patio pepper. Despite its naturally dwarf habit, which makes it perfect for use in a patio container, this variety packs a big punch. A very high yielding F1 hybrid, the immature fruits are an attractive light green in colour and mature to bright yellow. The fruits are large, well shaped and very sweet making them perfect for culinary use. Furthermore, this new variety has been bred to withstand both intense heat without fruit damage and disease, making it longer lasting than other varieties.

Seed Form	Natural
Seed Count	200/g
Plant Height	50cm
Plant Spread	50cm
Pot Size	25 - 30cm
Plug Time	24 - 28 days
Days to Maturity	73 - 78 days
Fruit Colour	Yellow
Fruit Shape	Blocky
Fruit Weight	125 - 135g

Liberty Belle  
70093988

SWEET PEPPER

Redskin  
70054884

REDSKIN

F1 Capsicum annuum

Redskin is a compact Sweet Pepper with an elegant arching habit that is highly suited to small pots or hanging baskets if unstaked. The fruit mature from dark green to a bright red three to four block fruit. Easy to pick and with a crisp sweet flavour. Redskin is a compact Sweet Pepper which has a spreading, cascading habit that is good for hanging baskets and patio planters. Compact 20in (50cm) tall, dwarf plants are a perfect choice for small-spaced gardens.

Plant Spread	40cm
Pot Size	15cm
Plug Time	28 - 42 days
Days to Maturity	86 - 90 days
Fruit Colour	Red
Fruit Shape	Heart Shape
Fruit Weight	5g

Mignonette  
70093991

TOMATO (DETERMINATE)

BIG LEAGUE

F1 Solanum lycopersicum

A unique determinate tomato with very large 14 - 21oz (400-600g) beefsteak fruits. Big League is perfect for a large patio container, reaching a final height of approximately 48" (120cm), and produces the largest fruit of any true container type to date. Because of the sheer weight of the fruit, Big League will require support.

Seed Form	Natural	Days to Maturity	47 days
Seed Count	404/g	Fruit Colour	Red
Plant Height	120cm	Fruit	Beefsteak
Plant Spread	70cm	Fruit Weight	400 - 600g
Pot Size	40cm		
Plug Time	21 - 24 days		

Big League  
70093990

RASPBERRY RUFFLES

F1 Solanum lycopersicum

Raspberry Ruffles and Lemon Sherbet are extra compact types suitable for use in a small container or even on a windowsill. The very neat, compact plants are easy to retail. Production time is very short and the plants adapt readily to different pot sizes.

Seed Form	Natural	Days to Maturity	48 days
Seed Count	330/g	Fruit Colour	Red
Plant Height	25cm	Fruit	Oblate
Plant Spread	20cm	Fruit Weight	15g
Pot Size	20cm		
Plug Time	21 - 24 days		

Raspberry Ruffles  
70092818

LEMON SHERBET

F1 Solanum lycopersicum

Lemon Sherbet is the most compact of our tomato varieties, producing small round yellow fruits which have a sweet flavour, produced in abundance all Summer long. Excellent, matches well with Raspberry Ruffles, excellent weather tolerance, attractive foliage.

Seed Form	Natural	Days to Maturity	48 days
Seed Count	330/g	Fruit Colour	Yellow
Plant Height	25cm	Fruit Shape	Oblate
Plant Spread	20cm	Fruit Weight	15g
Pot Size	20cm		
Plug Time	21 - 24 days		

Lemon Sherbet  
70092278

TOTEM RED IMP.

F1 Solanum lycopersicum

A compact Tomato that will produce a mass of small bright red fruit throughout the season. A very heavy cropping variety, Totem may need to be supported as the fruit matures to ensure the plant does not suffer with the weight of fruit. Totem is a strong and robust plant that performs well even in a poor season.

Seed Form	Natural	Days to Maturity	55 days
Seed Count	330/g	Fruit Colour	Red
Plant Height	45cm	Fruit	Oblate
Plant Spread	25cm	Fruit Weight	45g
Pot Size	25cm		
Plug Time	21 - 24 days

70094025

TOMATO DET. (BLIGHT TOLERANT)

Divinity  
70106235

DIVINITY

F1 Solanum lycopersicum

This close relative of our now established variety Summerlast offers larger fruit than Summerlast in addition to having the high Late Blight disease tolerance. Dark green foliage right through the season until fruit ripening stage. Divinity can be grown without support due to its strong stems. Can be grown in containers as well as the soil indoors and out. Change the fruit size to 45-50g.

Seed Form	Natural
Seed Count	330/g
Plant Height	45cm
Plant Spread	35cm
Pot Size	25cm
Plug Time	21 - 24 days
Days to Maturity	60 days
Fruit Colour	Red
Fruit Shape	Round
Fruit Weight	45 - 50g

SUMMERLAST

F1 Solanum lycopersicum

Summerlast is a determinate variety with 1.5oz (45g) fruits that can be grown very easily in a patio container without extensive support. With a high tolerance to late blight and unrivalled lasting performance, this variety maintains very dark green and healthy foliage well into late Summer when many other varieties have already died. The foliage remains dark green, even when fruits begin to ripen, making the plant much more attractive at point of sale compared to standard compact tomatoes.

Seed Form	Natural
Seed Count	330/g
Plant Height	45cm
Plant Spread	35cm
Pot Size	25 - 30cm
Plug Time	21 - 24 days
Days to Maturity	65 days
Fruit Colour	Red
Fruit Shape	Oblate
Fruit Weight	35 - 40g

Summerlast  
70086672

TOMATO (INDETERMINATE)

Pink Charmer  
70092274

PINK CHARMER

F1 Solanum lycopersicum

An indeterminate variety that yields an abundance of deep rosy-pink fruit. Pink Charmer is high yielding with up to 40 fruit per truss. Very good flavour, with a 10% Brix rating.

Seed Form	Natural	Days to Maturity	47 days
Seed Count	330/g	Fruit Colour	Pink
Plant Height	Indeterminate	Fruit Shape	Round
Plant Spread	60cm	Fruit Weight	20g
