Dear customers, dear partners,

In a rapidly evolving horticultural industry, our responsibility is clearer than ever: to anticipate, create, and deliver plant solutions that are aesthetic, inspiring, and sustainable, capable of enhancing both indoor and outdoor spaces while addressing the climatic and economic challenges of tomorrow.

True to its values, the Morel Group continues to pursue its breeding mission with consistency, building on over a century of expertise while progressively expanding its scope. The 2026-27 catalogue fully reflects this continuity in change, with an enriched, structured offering focused on resilience.

Following the successful integration of botanical cyclamens KOU MY® and LIFY®, as well as hellebores SNØYA® and GRØØVE®, Morel continues its momentum by introducing new high-potential genetics, including ELIXIA®, our interspecific cyclamen resulting from a cross between *Cyclamen persicum* and *Cyclamen purpurascens*, as well as *Tulbaghia*, particularly well suited to current climate evolution.

At the same time, our historical core, *Cyclamen persicum* F1, continues to evolve with high standards. Its climate tolerance is continuously strengthened, along with uniformity, performance under challenging conditions, and production reliability, helping to secure your crops from North to South, today and in the future.

The range is further enriched with ABSOLU® Sublima, bringing the DNA of ABSOLU® de Morel into a Maxi format. Innovation continues with the launch of INDIAKA® in a Mini version, METIS® CLOCHETTE®, recognizable for its bell-shaped flowers, and the very first Victoria cyclamen within the MIDI+ range.

This catalogue reflects our vision: a horticulture that is ever more beautiful, resilient, responsible, and sustainable.

Thank you for your trust, your loyalty, and your continued partnership. Together, let us keep building a forward-looking, innovative, and sustainable horticulture.

Breeding for a better world.

Eric BEAUDE
CEO

Breeding excellence

☀️ rooted in the Mediterranean

Founded in 1919 in the South of France, Morel Flowers is a breeding company with over a century of expertise dedicated to ornamental plants. From our historic base in Fréjus, on the Mediterranean coast, we have built a reputation for combining tradition, scientific rigour, and a relentless drive for innovation.

Naturally selected for heat tolerance

- A unique climate characterized by high light intensity, mild winters, and dry summers.
- Ideal conditions to select, test, and refine our genetics.
- Development of varieties with strong outdoor performance and resilience to climatic stress.

100%

made in Europe

Breeding, seed production & processing.

90%

international sales

across 70+ countries.

12

years of research

to bring a new hybrid to market.

💡 Innovation

is embedded in everything we do.

Our breeding programs focus on delivering high-value genetics combining aesthetic appeal, performance, and reliability.

From pioneering work in *Cyclamen persicum* F1 to the development of interspecific hybrids and new product concepts, our teams continuously push the boundaries of breeding.

Each variety is the result of years of selection, combining traits such as compactness, uniformity, flowering performance, fragrance, and tolerance to diseases.

Seed expertise, from selection to delivery

Seed is at the heart of our business. Morel Flowers has developed advanced know-how in seed production, processing, and quality control to ensure consistent and reliable performance for growers.

Our processes integrate:

- Careful selection of parent lines
- Controlled pollination and harvesting
- High-precision cleaning, grading, and testing
- Strict germination and quality standards

This mastery ensures high germination rates, uniform crops, and predictable results, key drivers of success for professional growers.

A partner for growers worldwide

Beyond breeding, Morel Flowers supports its partners with technical expertise, tailored recommendations, and a deep understanding of market needs. Our varieties are designed not only to perform in production but also to create value at retail, combining visual impact with consumer appeal.

Looking ahead

While staying true to our heritage, we continue to invest in new species, sustainable breeding approaches, and innovative concepts that respond to evolving market trends and environmental challenges.

We continue to dream big, exploring new ways to inspire the market while staying true to our roots.

Our commitment to seed quality, environmental responsibility, continuous innovation, teamwork, and a passion for excellence drives everything we do.

— Eric Beaude

OUTstanding Cyclamen®

☀️ Cyclamen excellence for outdoor performance

The OUTstanding Cyclamen® label identifies cyclamen varieties capable of delivering long-lasting, high-quality flowering under outdoor conditions, even in challenging climates.

Tested under real-life conditions in our open-field trials in Fréjus (France), these genetics meet the expectations of municipalities and specifiers alike: robustness, uniformity, low maintenance, and lasting visual impact.

🌡️ Trials under extreme conditions

Varieties are planted in containers, acclimatized, and then exposed to full sun without protection to assess their true outdoor performance.

Evaluation criteria include:

- Tolerance to water and climate stress
- Flowering density and uniformity
- Foliage quality and planting homogeneity

Only varieties achieving a score of **≥ 7/10** are awarded the OUTstanding® label, ensuring reliability for landscape applications.

Key benefits for landscape projects

- Excellent resistance to sun, wind, and rain.
- Extended flowering period.
- Low-maintenance requirements.

🌸 A broad plant palette

With 78 listed varieties, the OUTstanding Cyclamen® range addresses a wide diversity of projects: beds, urban planters, terraces, containers, public spaces, and pedestrian areas.

From compact formats such as METIS®, TIANIS® and INDIAKA®, to more structuring plants like MIDI+®, PETIT MOULIN®, and the fragrant ABSOLU® de Morel, each range provides a solution tailored to landscape design.

Blooming in store.

Inspiring Retail, Made Simple!

This year, many of you explored our new Blooming in Store concept: a ready-to-use, practical approach to merchandising designed to boost in-store visibility.

From Pink October to Christmas, Valentine's Day, pallet highlights, and modular POS furniture, the space showcased turnkey ideas ready to implement.

Our fully redesigned labels, clearer, more expressive, and aligned with our refreshed identity, also received excellent feedback.

Moreflowers.com

Discover your central hub for everything More!

Explore our varieties, access technical resources, browse marketing tools, and stay up to date with our latest innovations.

Designed to support your business, the website brings all essential information together in one place.

Order your labels with ease!

Our new online solution allows you to browse available designs, request quotes, and place orders in just a few clicks. A streamlined experience to save time, simplify your process, and ensure your plants are always perfectly presented at retail.

Media platform.

Step into a world of inspiration and resources! Access an extensive library of lifestyle images, product visuals, catalogs, culture guides, and more. Request your login today and unlock exclusive marketing and sales tools designed to boost your success!

Social media.

Stay connected and inspired!

Follow us on social media for fresh updates, behind-the-scenes insights, grower stories, and creative ideas.

100447 METIS® ROSY GLOW®

- With its soft pastel-pink petals, METIS® ROSY GLOW® recalls the elegance of Japanese cherry blossoms (Sakura).
- Vigorous, ultra-rounded habit with exceptional uniformity.
- Ideal for autumn and winter flowering.
- Beautiful small, dark leaves that create a strong contrast with the flower colour.
